

# ThinKnx UP client

## 2024/08/12 - rel. 1.2.36 (Beta) (Envision, Windows)

### Enhancements

- Massive improvement on memory usage to prevent problems on Envision and on windows devices with limited resources

### Requirements

- Some features require server fw 1.1.10.25 and configurator 1.4.0.1 or greater.

## 2024/08/12 - rel. 1.2.35 (All platforms)

### Enhancements

- Added a customizable popup with favourites objects selectable from the ones on the project
- Added a new object (visible only in portrait mode) to better sort elements in list view (separator)
- Added new options to switch object: you can switch on/off dimmered lamps with simple tap and you can open dimmer popup with long press
- Added possibility to hide modalities that are not supported in HVAC popup
- Now it is possible to customize the fan levels name and to hide the OFF mode
- Added a new interactive legend for charts to improve data readability
- Added new options for roller and shutter popup to hide stop or absolute position
- Many improvements on ViaVai access control system that is now completely manageable by app
- Added option to keep the device always awake while using the app (no lockscreen - los)
- Added possibility to launch a scheduled item instantly and the information on last and next programmed execution
- Improved connection with server & cloud

### Fixes

- Fixed some errors on cameras activation in specific cases
- Fixed behavior of switch object when configured as ON/OFF normally closed
- Fixed some glitches on portrait view for universal commands
- Other minor bugs fixed

### Requirements

- Some features require server fw 1.1.10.25 and configurator 1.4.0.1 or greater.

## 2024/01/13 - rel. 1.2.33 (All platforms)

### Enhancements

- Improved overall app responsiveness

## 2023/07/05 - rel. 1.2.28 (All platforms)

### Enhancements

- Improved overall app responsiveness

### Fixes

- Fixed some errors on cameras activation in specific cases
- Fixed visualization on phones with dynamic island

## 2023/06/05 - rel. 1.2.27 (All platforms)

### Enhancements

- Implemented client authentication from APP without OTP
- Added custom test to share project and OTP of a specific project
- Added second ringtone volume for Envision with time validity
- Added possibility to reset security password
- Added timer with auto off for switching object
- Added possibility to record offline buttons (button with action for single client)
- Added possibility to set custom background in custom pop-ups

### Fixes

- Fixed issues with camera's password
- Fixed thermostat on/off status & modality
- Fixed chrono-thermostat sharing between multiple thermostats
- Fixed download for weather image from OpenWeatherMap
- Fixed HVAC on/off status & modality
- Fixed minor bugs

## **2022/10/13 - rel. 1.2.23 (All platforms)**

- Password for cameras and other elements can now be managed directly from app - Clients can be authenticated and managed with multiple options from app - Clients can now be limited to certain time periods or only local - Added options for pages background with custom colors and embedded images - Added possibility to skip safety delay on simple push buttons to have faster reaction - Added further options on slider behavior - Fixed minor bugs

## **2022/05/09 - rel. 1.2.22 (All platforms)**

### **Enhancements**

- Added option to automatically update projects from cloud when available.

### **Fixes**

- Fixed a bug that was preventing opening of projects in some specific cases.

## **2022/05/06 - rel. 1.2.21 (All platforms)**

### **Fixes**

- Fixed a bug that was preventing the project to load properly in very specific cases

## **2022/05/03 - rel. 1.2.20 (All platforms)**

### **Enhancements**

- Added support for hide/show objects based on events
- Improved responsiveness on Press/Release buttons

### **Fixes**

- Fixed and improved sliders behavior
- Fixed minor bugs

## **2022/04/05 - rel. 1.2.19 (All platforms)**

## Enhancements

- Added support for custom pop-ups
- Added support for slider widget
- Added many new commands
- Added possibility to turn off thermostat entirely
- Added actual temperature in HVAC control
- Improved responsiveness on Press/Release buttons

## Fixes

- Fixed and improved thermostat handling

## 2022/01/17 - rel. 1.2.18 (All platforms)

### Fixes

- Fixed a problem on Press/Release buttons to prevent unwanted behaviors on short touches
- Fixed a problem with keyboard
- Fixed a problem with project pop-up when closing settings

## 2021/12/23 - rel. 1.2.16 (All platforms)

### Fixes

- Fixed images for universal feedback objects
- Fixed dimmers icons and pop-ups

## 2021/12/20 - rel. 1.2.15 (All platforms)

### Enhancements

- Improved memory usage
- Changed roller shutters icons

### Fixes

- Fixed page jump in specific cases

## 2021/12/13 - rel. 1.2.14 (All platforms)

### Enhancements

- Improved GIF images handling
- Other memory consumption optimizations

### Fixes

- Fixed a bug on HVAC object preventing to see the setpoint temperature in portrait mode
- Fixed errors on page jump not always working properly
- Fixed rollers and blinds pop-ups in various configurations
- Restored SIP functionalities on legacy Envisions
- Restored RTSP functionalities on legacy Envisions
- Fixed sound on several platforms
- Fixed strange problems with touch area on some iOS devices
- Many minor fixes and improvements

## 2021/11/28 - rel. 1.2.13 (All platforms)

### Enhancements

- Added Biometric protection to protect app or single object, supports face recognition or finger print (Ios).
- Added possibility to optimize project to reduce memory footprint in big projects
- Added support for animated images (GIF)
- Added possibility to mirror images
- Added OFF button in thermostat pop-up to set frost/heat protection
- Added many new pop-ups for shutters to manage also actuators without absolute positioning and curtains (left/right movement)
- Added possibility to choose rotation range for lamellas (0-180 or 0-90)
- Improved irrigation panel functionalities
- Improved connection with server both locally or via cloud
- Added possibility to hide the DEMO project
- Added possibility to rotate the whole interface for Envision installed vertically

### Fixes

- Fixed bug on audio notification
- Fixed bugs on irrigation panel
- Many minor fixes and improvements

## 2019/09/19 - rel. 1.2.5 (Windows Player)

### Enhancements

- Customizable setpoints for comfort and HVAC widget
- HVAC pop-up automatic update also when open
- Improved feedback for comfort widgets

### Fixes

- Fixed a bug on push notification pop-up
- Fixed alarm partition handling in keypad
- Improved connection stability
- Fixed mouse propagation under text labels

## 2019/07/02 - rel. 1.2.4 (Envision)

### Fixes

- Backlight no long freezing on standby
- Audiofy plugin is now working properly
- Push Notification pop-up is now closing when needed

### Enhancements

- Screen wake-up when a sound is played

## 2019/04/30 - rel. 1.2.4 (Windows Player)

### Fixes

- Fixed full screen startup option

## 2019/04/29 - rel. 1.2.3 (Envision & Windows Player)

### Enhancements

- Improved startup experience

## Fixes

- Fixed PIN handling in case of switch object with momentary actions (on press/ on release)
- Fixed date/time handling in settings
- Fixed update of Internet synchronization selection for date/time
- Fixed SIP registration problems under some circumstances

## 2019/04/24 - rel. 1.2.2 (Envision & Windows Player)

### Enhancements

- Deep improvements for SIP audio communication with auto echo suppression
- Improved realtime visualization for H264 cameras
- Added touch feedback on all interactive objects
- Better support for fan integrated with “thermo” object
- Reduced the ratio of updates sent when changing values from pop-ups
- Improved translations

### Fixes

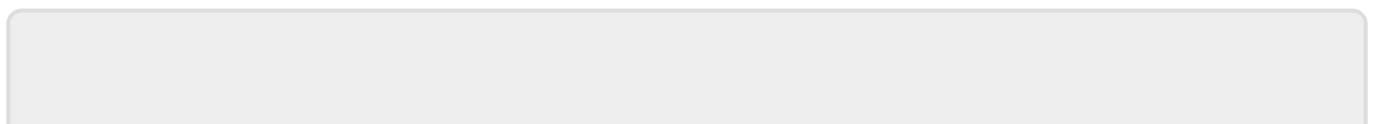

- Fixed crashes when server was not reachable or Cloud connection was closed
- Fixed a problem that was preventing the PIN dialog to appear
- Fixed overlapping issue with text fields that was preventing the click to propagate to the bottom objects
- OFF command on RGB pop-up is now working also for tunable white lights
- Fixed slats pop-up that was not working when alone
- Fixed a bug that was showing icon for thermostat also when not enabled
- Fixed a bug that was showing icons for fan tuning also when not enabled in some circumstances
- Fixed Sonos cover art that was not showing with some sources

## ThinKnx Classic client

### 2019/02/07 - rel. 1.0.42 (Envision)

### Fixes

- Backlight no long freezing on standby
- Audiofy plugin is now working properly
