Software Shortcuts

Thinknx UP Configurator version 1.3.0.20 or above supports many shortcut keys that the integrator can use in order to navigate and execute commands in a much faster and easier way. Some of the shortcuts below are also supported in version 1.3.0.18:

Shortcut	Description
TAB	Select next property in Property View or next node in Tree View.
TAB + SHIFT	Select previous property in Property View or previous node in Tree View.
SHIFT + F	Focus the search bar.
SHIFT + G	Create a group using the selected objects / Ungroup objects in a selected group.
CTRL + G	Group/Ungroup selected objects.
CTRL + C	Copy object. The command will automatically add a suffix to the object label.
CTRL + V / **CTRL + INS**	Paste with suffix in label.
CTRL + W	Paste without suffix in label.
CTRL + Z	Undo action.
CTRL + Y	Redo action.
CTRL + S	Save current project.
CTRL + F	Open Search KNX Group window.
CTRL + N	Open Wizard window.
CTRL + O	Open Project Manager window.
CTRL + Space	Open Add UI Object window.
CTRL + A	Select all objects in current page.
CTRL + DEL	Remove suffixes from labels.
CTRL + (+/-)	Zoom in/out.
CTRL + (arrow)	Move view.
CTRL + P	Toggle grid.
SHIFT + (arrow)	Move 5 pixels.
(arrow)	Move 1 pixel.
SHIFT + (cursor) / **SHIFT + Windows**	Select multiple items in the working area.
